

小鼠抗人 IgG(亲和纯化)

- 中文名称: 小鼠抗人 lgG (亲和纯化)
- 英文名称: Mouse anti-human IgG (AffiniPure)
- 相关类别: 其他二抗
- 储 存: 冷冻 (-20℃)

技术规格

Background	Immunoglobulin G (IgG) is one of the most abundant proteins in serum with normal levels between 9.5-12.5 mg/ml in adult blood. IgG is important for our defense against microorganisms and the molecules are produced by B lymphocytes as a part of our adapti ve immune response. The IgG molecule has two separate function s; to bind to the pathogen that elicited the response and to recr uit other cells and molecules to destroy the antigen. The variabilit y of the IgG pool is generated by somatic recombination and the number of specificities in an individual at a given time point is es timated to be 1011 variants.
Applications	1/2000-10000 for ELISA 1/1000-5000 for Western blotting 1/200-1 000 for Immunohistochemistry/cytochemistry
