

兔抗 ADD1 多克隆抗体

中文名称：兔抗 ADD1 多克隆抗体

英文名称：Anti-ADD1 rabbit polyclonal antibody

别名：ADDA

相关类别：一抗

储存：冷冻（-20℃）

抗原：ADD1

宿主：Rabbit

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	Adducins are a family of cytoskeleton proteins encoded by three genes (alpha, beta, gamma). Adducin is a heterodimeric protein that consists of related subunits, which are produced from distinct genes but share a similar structure. Alpha- and beta-adducin include a protease-resistant N-terminal region and a protease-sensitive, hydrophilic C-terminal region. Alpha- and gamma-adducins are ubiquitously expressed. In contrast, beta-adducin is expressed at high levels in brain and hematopoietic tissues. Adducin binds with high affinity to Ca(2+)/calmodulin and is a substrate for protein kinases A and C. Alternative splicing results in multiple variants encoding distinct isoforms; however, not all variants have been fully described.
Applications:	ELISA, IHC
Name of antibody:	ADD1
Immunogen:	Fusion protein of human ADD1
Full name:	Alpha-adducin
Synonyms :	ADDA
SwissProt:	P35611
ELISA Recommended dilution:	500-5000
IHC positive control:	Human lung cancer
IHC Recommend dilution:	50-200
