

兔抗 TSLP 多克隆抗体

中文名称:	兔抗 TSLP 多克隆抗体
英文名称:	Anti-TSLP rabbit polyclonal antibody
储 存:	冷冻 (-20℃)
抗 原:	TSLP
宿 主:	Rabbit
相关类别:	一抗
反应种属:	Human
标记物:	Unconjugate
克隆类型:	rabbit polyclonal

技术规格

Background:	This gene encodes a hemopoietic cytokine proposed to signal through a heterodimeric receptor complex composed of the thymic stromal lymphopoietin receptor and the IL-7R alpha chain. It mainly impacts myeloid cells and induces the release of T cell-attracting chemokines from monocytes and enhances the maturation of CD11c(+) dendritic cells. The protein promotes T helper type 2 (TH2) cell responses that are associated with immunity in various inflammatory diseases, including asthma, allergic inflammation and chronic obstructive pulmonary disease. The protein is therefore considered a potential therapeutic target for the treatment of such diseases. Alternative splicing of this gene results in multiple transcript variants.
Applications:	ELISA, WB
Name of antibody:	TSLP
Immunogen:	Fusion protein of human TSLP

Full name:	Thymic stromal lymphopoietin
SwissProt:	Q969D9
ELISA Recommended dilution:	2000-5000
WB Predicted band size:	18 kDa
WB Positive control:	Jurkat cells
WB Recommended dilution:	500-2000
