

兔抗 UBL4B 多克隆抗体

中文名称：兔抗 UBL4B 多克隆抗体

英文名称：Anti-UBL4B rabbit polyclonal antibody

相关类别：一抗

储 存：冷冻（-20℃）

宿 主：Rabbit

抗 原：UBL4B

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

Ubiquitin is a 77 amino acid protein that targets proteins for degradation by the 26S proteasome. Ubiquitin-like proteins are not directly involved in protein degradation, but appear to have many mechanistic similarities with the ubiquitin pathway. UBL4B (Ubiquitin-like protein 4B) is a 174 amino acid cytoplasmic protein that contains a ubiquitin-like domain. UBL4B likely arose by retroposition during mammalian evolution from UBL4A, an X-linked intron-bearing housekeeping gene. While UBL4A is highly conserved, UBL4B has undergone rapid evolution and may have evolved new functions. Expression of UBL4B is restricted to post-meiotic germ cells in testis and ovarian tissue, where it likely functions in post-translational protein modification.

Applications:	ELISA, IHC
Name of antibody:	UBL4B
Immunogen:	Full length fusion protein
Full name:	ubiquitin-like 4B
SwissProt:	Q8N7F7
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human esophagus cancer and human liver cancer
IHC Recommend dilution:	25-100
