

小鼠抗 PGBD3 单克隆抗体

中文名称： 小鼠抗 PGBD3 单克隆抗体

英文名称： Anti-PGBD3 mouse monoclonal antibody

别名： piggyBac transposable element derived 3

相关类别： 一抗

储存： 冷冻（-20℃）

宿主： Mouse

抗原： PGBD3

反应种属： Human

标记物： Unconjugate

克隆类型： mouse monoclonal

技术规格

Background:

This gene is a member of a small family of genes derived from piggyBac transposable elements. The encoded protein contains a zinc-ribbon domain characteristic of transposon-derived proteins and may function as a regulator of transcription. Alternative splicing occurs between a splice site from exon 5 of the adjacent upstream gene 'excision repair cross-complementation group 6' (ERCC6, GeneID: 2074) and the 3' splice site upstream of the open reading frame (ORF) of this gene, which activates the alternative polyadenylation site downstream of the piggyback-derived-3 ORF. The resulting transcripts encode a fusion protein that shares sequence with the product of each individual gene. Pseudogenes for this gene are defined on chromosomes 4, 5 and 12. [provided by RefSeq, Mar 2016]

Applications:	WB
Name of antibody:	PGBD3
Immunogen:	Fusion protein of human PGBD3
Full name:	piggyBac transposable element derived 3
SwissProt:	Q8N328
WB Predicted band size:	68 KD
WB Positive control:	HepG2, Hela, MDCK, MCF7 cell lysates
WB Recommended dilution:	500-2000
