

兔抗 F5(Coagulation factor V light chain)多克隆 抗体

中文名称：兔抗 F5(Coagulation factor V light chain)多克隆抗体

英文名称： Anti-F5(Coagulation factor V light chain) rabbit polyclonal antibody

别名： coagulation factor V; FVL; PCCF; THPH2; RPRGL1

相关类别： 一抗

储存： 冷冻 (-20℃)

宿主： Rabbit

抗原： F5(Coagulation factor V light chain)

反应种属： Human, Mouse, Rat

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:	This gene encodes an essential cofactor of the blood coagulation cascade. This factor circulates in plasma, and is converted to the active form by the release of the activation peptide by thrombin during coagulation. This generates a heavy chain and a light chain which are held together by calcium ions. The activated protein is a cofactor that participates with activated coagulation factor X to activate prothrombin to thrombin. Defects in this gene result in either an autosomal recessive hemorrhagic diathesis or an autosomal dominant form of thrombophilia, which is known as activated protein C resistance.
--------------------	--

Applications:	ELISA, IHC
Name of antibody:	F5(Coagulation factor V light chain)
Immunogen:	Synthetic peptide of human F5(Coagulation factor V light chain)
Full name:	coagulation factor V
Synonyms:	FVL; PCCF; THPH2; RPRGL1
SwissProt:	P12259
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human colorectal cancer
IHC Recommend dilution:	20-100
