

兔抗 PRKCE 多克隆抗体

中文名称：兔抗 PRKCE 多克隆抗体

英文名称：Anti-PRKCE rabbit polyclonal antibody

别名：PKCE; nPKC-epsilon

相关类别：一抗

抗原：PRKCE

储存：冷冻（-20℃）

宿主：Rabbit

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:	Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and the second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. The protein encoded by this gene is one of the PKC family members.
Applications:	ELISA, IHC
Name of antibody:	PRKCE
Immunogen:	Fusion protein of human PRKCE
Full name:	protein kinase C, epsilon

Synonyms :	PKCE; nPKC-epsilon
SwissProt:	Q02156
ELISA Recommended dilution:	1000-5000
IHC positive control:	Human thyroid cancer and Human liver cancer
IHC Recommend dilution:	50-200
